

## **Maturion Criteria Engine Policy**

Defines how Maturion generates, validates, and adapts Minimum Performance Standard (MPS) criteria.

### **Core Generation Rules**

- Must be evidence-first (Annex 2 style)
- Follow singular structure: Evidence → Noun → Context
- Avoid compound logic and vague statements

### **Tailoring Logic**

- Incorporates organization name or role if needed
- Adjusts phrasing based on industry terminology
- Follows role-based specificity

### **Rewrite and Feedback Loop**

- Maturion accepts rejections and rewrites
- Improves model accuracy over time
- Learns sector nuances
